- Established in 1996, this partnership company is considered one of the leading citrus exporters in the region. With an export capacity of 100,000 metric tons per season, the company is ranked the first among Egyptian citrus exporters according to the last report of the Egyptian Ministry of Trade & Industry body; the General Organization for Export/Import Control (GOEIC).

- Our fresh oranges from Egypt are available most of the year. Their vivid, naturally orange color is due to their growing climate. El Gebaly Fruit Co. is famous also with its easy peelers mandarins, Fresh lemons, Red Flame and Sugraone seedless grapes, Pomegranates that contains masses of edible juicy seeds and fresh healthy vegetables. All varieties are packed at our facilities in accordance to strict and professional quality control processes

- Our brand and label on our products is the hallmark of guarantee that you are buying fresh products of the highest quality.

Traceability

All our fresh products shipments, including boxes and containers used in transport, are labeled and coded. This is so that the product, batch and producer farm can be identified at any time.
This allows any product to be traced back through any part of its lifecycle to enable greater control and improve quality

Our Strength

1.Operating the strictest safeguards to protect our customers from any risk, we emphasize our international quality standards but always strive to exceed it.

2. Modern technology and machinery.

3. Strong laboratory testing & quality control prior to marketing.

4. Effective and efficient packing under strict hygienic conditions.
5. Highly focused customer service with prompt response and attention to all matters.

Magrabi Agriculture "MAFA" Company

13 Abdel Khalek Tharwat St.,
Cairo 11599, Egypt.
Tel.: +202 25781151, Fax.: +202 25781152
magrabi@magrabi-agriculture.com
www.magrabi-agriculture.com

Overview:

Since its foundation in 1989, Magrabi Agriculture has bolstered the Egyptian private investment sector by owning and managing an investment project with capital of over a hundred million US dollar. This venture comprises over 12,000 acres of reclaimed desert land in various parts of Egypt. This now-fertile land yields a total production in excess of 110,000 tons per year.

Mission Statement:

Magrabi Agriculture is dedicated to investing in human resources establishing a brand name of excellence, promoting environmental awareness, improving safe food production and investing in research and development.

Future Prospects:

Magrabi Agriculture foresees and utilizes untapped potential to stay ahead of its counterparts. Long-term strategic plans focus on expansion, be it land, yield, varieties, or make share, both foreign and domestic.

Our Products:

Then main citrus varieties at Magrabi are:-

Strawberries are grown at Magrabi Agriculture from mid-November until late May.
Magrabi also subcontracts the processing of its strawberries into purée.
Grapes season at the Magrabi farms runs from the last week of May until mid-July. Both white (seedless) and red (both seedless and seeded).
Leaf Salads include:-
Iceberg lettuce,
White and red cabbage.
Herbs and Baby Leaves
"and others" include:-
Mint,
Dill,
Coriander, and Basil.
Capsicum
Flowers.

New Products:

As part of Magrabi Agriculture's mission of continual development it has many new products in the pipeline, these include:

Tomatoes (Beef, Round, Cherry and Plum).
Green Beans (Bobby and Fine).
Peaches
Pomegranates
Dates
Melons

Quality Assurance:

Magrabi Agriculture maintains a comprehensive quality assurance system, developed according to, and audited against, international food safety and quality management standards.
Magrabi Agriculture has held a number of certificates in conformity to high international standards of agricultural and manufacturing practices such as:
GlobalGAP, BRC, BOPP, ETI (Sedex Members), MPS, IFS, ISO 22000:2005, McDonald's SQMS and Fairtrade.

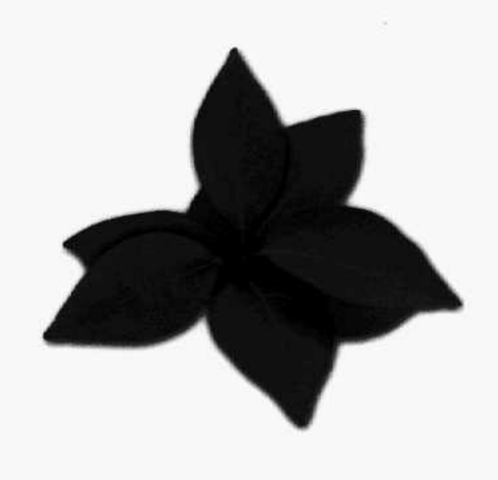

Packhouses:

Magrabi Agriculture's various packhouses are all built and operated according to the highest international standards and are all BRC and IFS certified. The packhouses are:
Citrus
Soft Fruit
Capsicum and Vegetables
Herbs and Baby Leaves
Flowers (also BOPP certified)

Social Accountability:

Magrabi Agriculture takes up the responsibility of making the working conditions rewarding on both the professional and the social levels.
Medical attention is also ensured for all personnel, where a new on-farm paramedic hospital has been established, complete with ambulance service.

In cooperation with Campden University (UK), Magrabi Agriculture plans to renovate its existing lab to achieve full accreditation under ISO 17025 and CLAS in future. Laboratories include:
Chemical Analysis Lab
Microbiological Analysis Lab
Calibration Lab
Plant Diseases Analysis Lab
The Plant Tissue Culture Lab
Pesticide Residue Analysis Lab

KINGDOM AGRICULTRUAL DEVELOPMENT COMPANY

KADCO
E G Y P T

Coming From
The Nubian Desert

Horticultural crops including Table Grapes, Dates, Melons, Green Beans and Sweet Peppers are exported in the EU since 2002. Table Grapes include different varieties of both White Seedless and Seeded varieties that start production by the end of April – early May filling a well known gap in the world production during this period. Both Green and Orange Flesh Melons are in the markets in both Spring and Fall.

Forage crops such as Alfalfa have great weight in KADCO's business plan. Alfalfa is sun dried, baled and shipped to the GCC markets with the potential of penetrating Europe in the near future. Favorable climatic conditions in Toshka allows for a maximum drying period of 24 hours keeping all leaves of the alfalfa with soft and tender stems. Production is featured with high protein content and low fiber percentage.

Agro industries are well within the Company's future plans. KADCO is exploring vertical integration such as producing tomato paste, dehydrated onions and fruit puree. Another potential under study is a dairy project where part of the production would be dedicated to serve a herd of professional varieties of milk productive cows. High value end products are aimed such as powder milk and cheese.

Al Heba is an Egyptian business committed to serve the needs of the fresh fruit export industry. It was founded in 1987.
By focusing on two major activities, Market Information and Quality Control & Tractability, Al Heba has helped to make more profitable the international fruit trade, mainly for Southern Hemisphere exporters.

Al Heba relies on a solid team of professionals, a vast network of international contacts, offices in nine of the world`s most important fruit ports and a home office in Egypt. It has more than 50 clients and inspects about 60 million cases of fruit each year from a dozen different countries
Its long history and numerous contacts in the international fresh fruit business have given Al Heba a profound knowledge of logistical and trade issues. With this background - so highly valued by the most important traders in the industry - Al Heba invites you to Discover the Value of the Experience.

Egyptian Grapes

Egyptian Grabes enjoy a good reputation abroad :
Egyptian grapes are already making a good impression abroad. Industry acclaimed British magazine Freshproduce ran more than an article on this season's Egyptian grapes market.

Green Beans

Modified Atmosphere Packaging ensures fresh green beans sea freight :
Egyptian fresh produce exporters are increasingly turning toward sea freight since air freight has lately faced some problems like insufficient trips, scarcity of cargo spaces and high costs.

WE specialized in exporting all the items of fresh fruits, vegetables & food stuffs.
The average annual total amount of exporting transaction is around 4500 Tons by air shipping and 5000 Tons of Land & Sea Shipping all the year around.

BASF
Crop Protection
Middle East & Nile Countries

BASF Ltd., Egypt
55, Street 18
11431 Maadi Saryat
Cairo - Egypt
C.R. 5921 - South Cairo
Tel.: 002-02-2 750 9880
Fax: 002-02-2 378 1442
E-mail: basf.egypt@basf.com

BASF is the world's leading chemical company and a pioneer in crop protection products' development.

As a leading producer of agricultural products, our portfolio includes herbicides, fungicides, insecticides, seed treatment technologies and plant growth regulators that provide the optimal level of crop protection. Our innovative products help growers maximize yields to get the most out of every acre to meet the food and fuel demands of a growing world population.

We are committed to developing products that are designed to target specific pests, weeds, or diseases only, while meeting or exceeding strict human and environmental safety standards, factoring in any short- and long-term impacts.

We offer our customers sustainability in agriculture, sustainability in development.

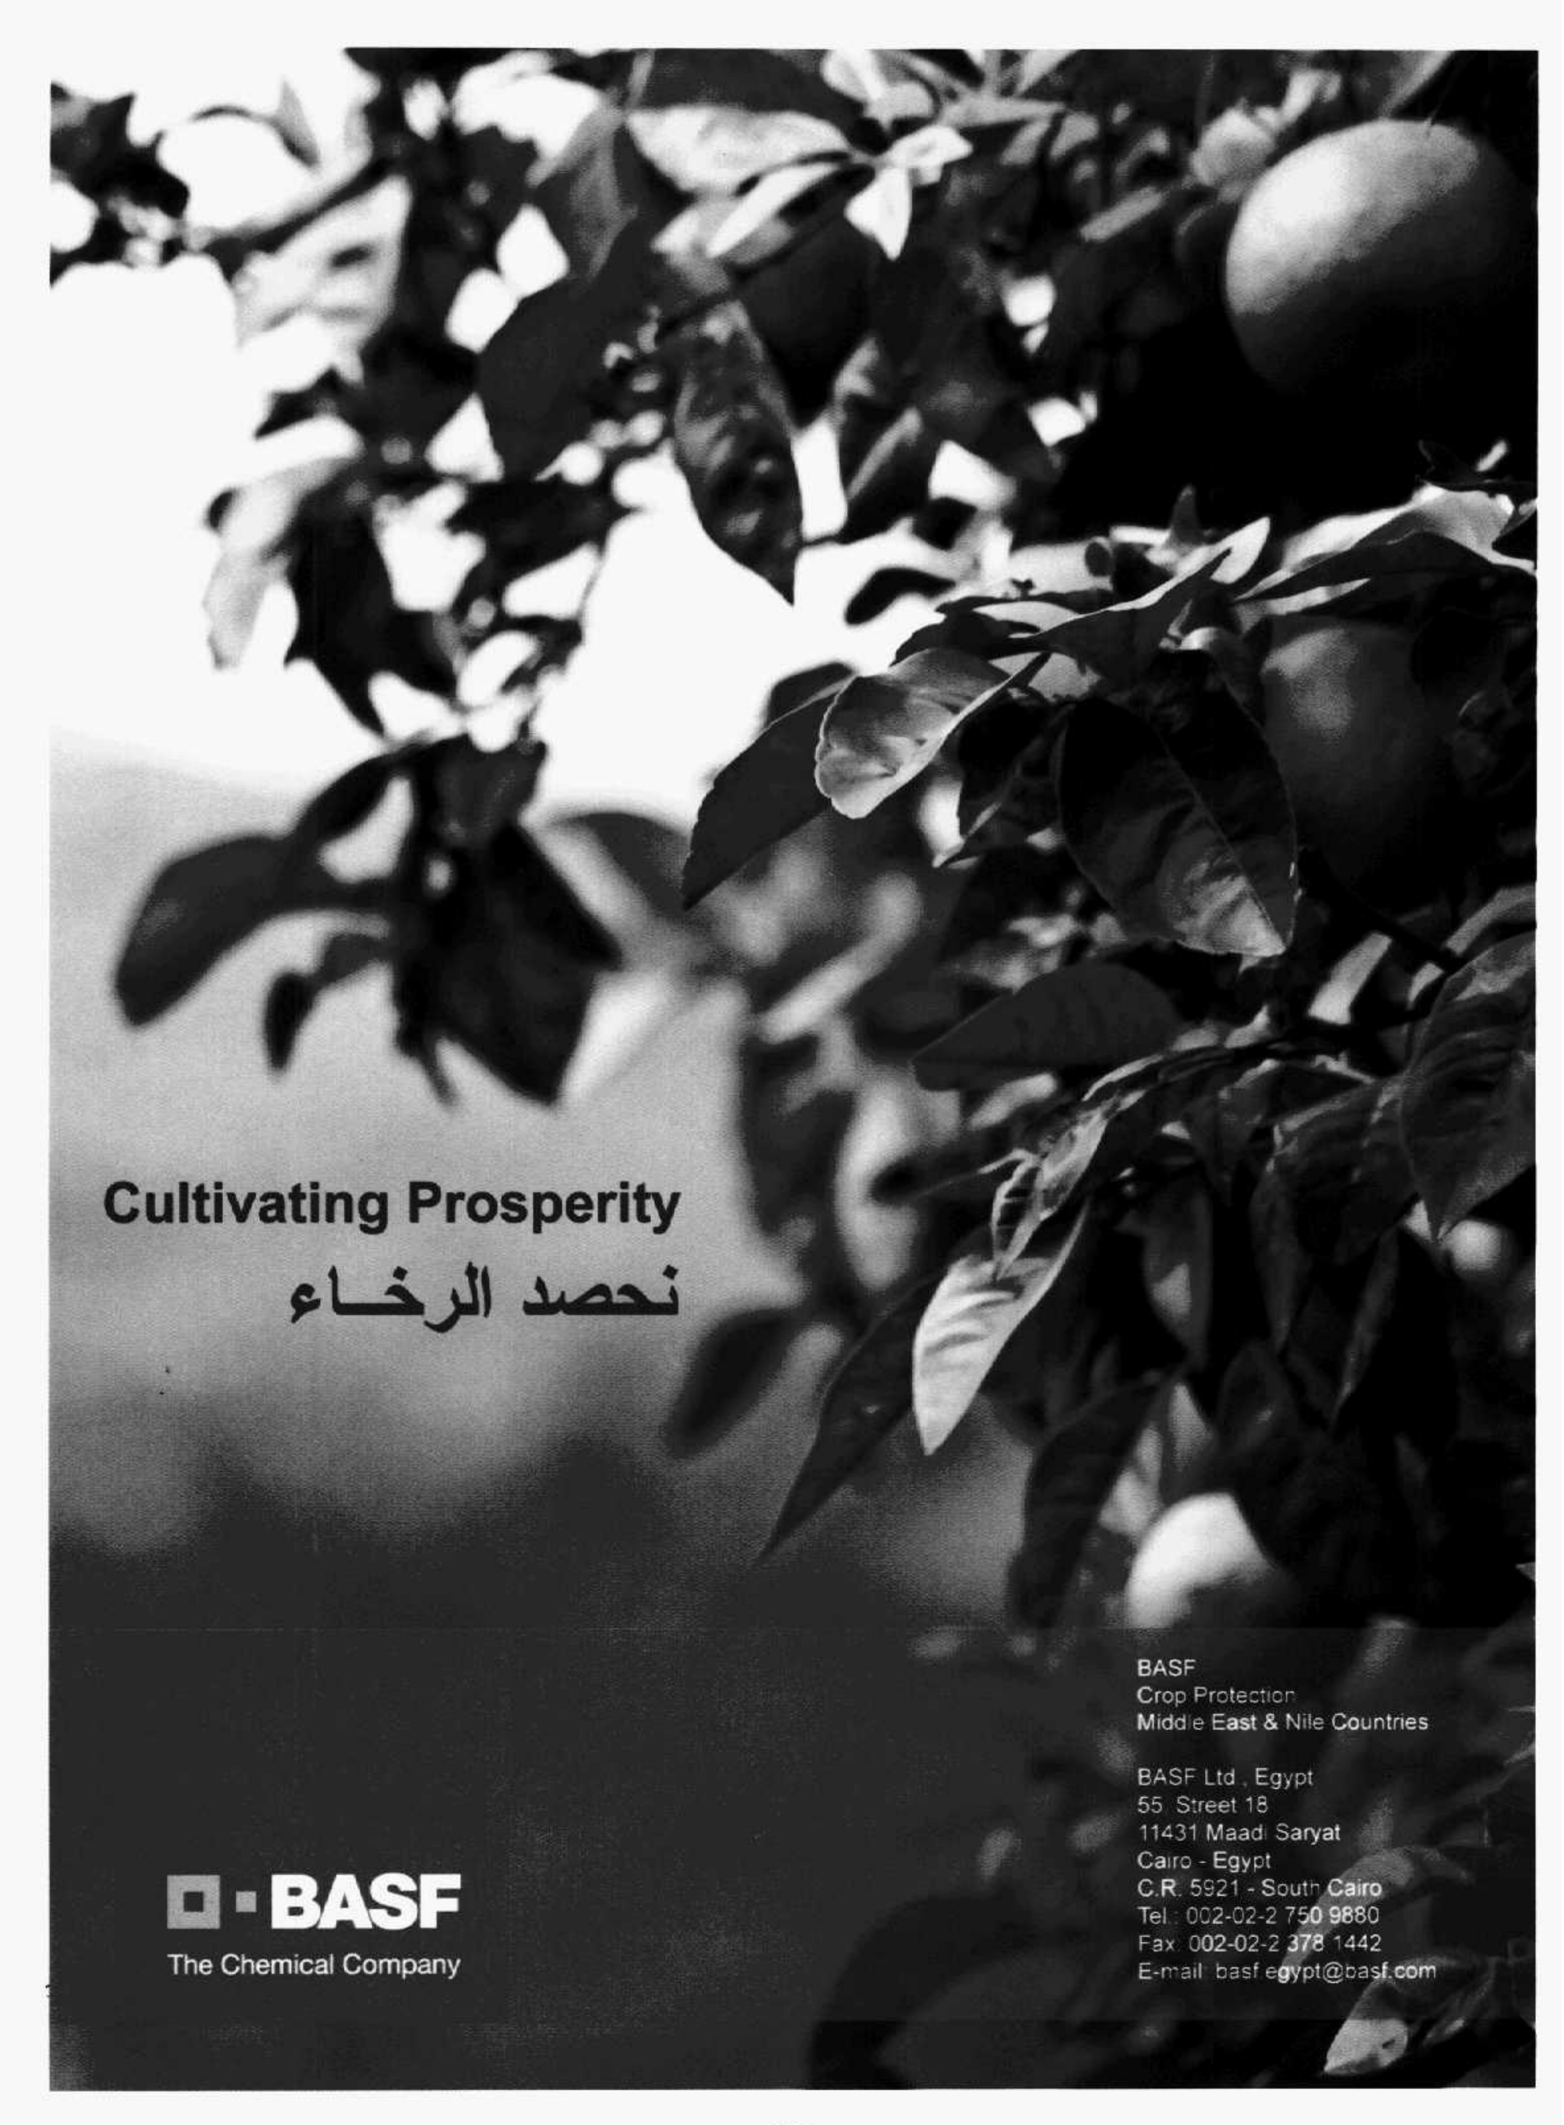

- We at BASF provide specific products and services that ensure sustainable development through offering smart protection programs for farmers & producers, these programs make sure that the farmer is producing high quality food.
- Using European certified crop protection products facilitates the export of fruits and vegetables from foreign countries to the European Union. European MRL (Minimum Residue Level) standards have been the major factor when choosing between crop protection products. This factor plays a key role in acceptance of imports of fresh food exports to the EU. This is why BASF products are an essential facilitator in the growth and development of exports of fresh produce to EU countries.
- We help farmers establish and implement economically and environmentally appreciated agriculture systems and cycles.
- One of BASF's main objectives is to enhance the agriculture process as a whole, ensuring that it is done in the safest, most efficient and sustainable methods possible for all parties involved in the process: the farmer, the producer, the exporter, the distributor and the end user or consumer.
- At BASF we realized that the best way to avoid Crop Protection products' misuse is by education and knowledge sharing, and BASF takes this as one of its main roles and responsibilities.
- This is why BASF has established a team of experts in the Middle East Region ensuring that this Global Expertise and know how is made available to our local partners.

Our diversified Product Portfolios.

We provide a varied range of product portfolios tackling various diseases and pests for each crop. This diversity guaranties to provide the producer with an increase in yield quality and quantity, leading to a mounting and sustainable development in the overall cultivation and harvesting processes.

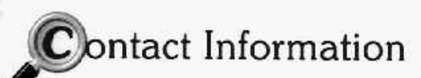

Our Customers are our Priority

BASF has established a Regional Crop Protection body in Egypt, serving all Middle East countries. Through this strong presence, BASF aims to provide its customers and partners with the most efficient and reliable services possible, enabling its partners to reach an ongoing prosperous development in agriculture and in the quality of the food being delivered to our growing world.

GrowTech export division, an extension of **GrowTech Egypt Group**, was established as a supplier of high quality conventional and organic peanuts to the European market. GrowTech peanut produce is primarily sourced from GrowTech farms where the company can have a continuous eye on quality thanks to our in-house agronomists who have more than 30 years of agricultural experience.

In 2010, GrowTech established its newest peanuts processing plant in Egypt using latest handling, processing and sorting techniques available worldwide, and is in the process of expanding its processing facilities further.

Company Overview

AgroEgypt is a family owned business. It was founded by Mr. Roshdy Ghallab who started his little business in 1976 by exporting his first shipment of green beans to the Netherlands. Then the business kept growing through the years until 2003 when AgroEgypt was established to include the sons of Mr. Ghallab who choose to continue the growth of their company.

AgroEgypt main activity is exporting of best selected Egyptian Fruits and Vegetables to all over the world. By maintaining our respect to the farmers and to our customers we believe that our company will keep growing and delivering top quality agricultural products by assuring quality control, administration, marketing, sales and export activities.

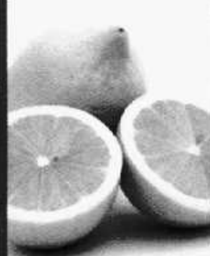

AgroEgypt has a proven reputation for consisitently delivering the highest quality of fruits and vegetables and this is combined with outstanding customer service, reliability and very attractive pricing.

Gaara Establishment
since 1874

مؤسسة جعارة

إستيراد - تصدير

بذور - إسمدة - مبيدات حيوية
منظمات نمو طبيعية - ميكنة زراعية
ادوات تنسيق حدائق ولاند سكيب

Gaara Establishment was founded in 1874 in Cairo, Egypt. The company at that time was solely specialized in the vegetable seeds business. Gaara Establishment is now exclusively representing more than 15 companies in Europe & Asia. This includes various ranges of activities such as, hybrid vegetable seeds, biological control agents, for pest, diseases, nutrient and water management solutions, agriculture machinery, landscape, irrigation and gardening tools.

The company is now extending the scope of the business to include emerging markets in the Middle East and North Africa.

The company's business philosophy is deemed to the principal of strong orientation toward quality aspects. This has been one of the success factors of the company, which has further contributed to higher customer satisfaction levels.

Gaara Establishment was internationally recognized by independent organizations like BID, Business Initiative Direction, which has granted several prizes and TQM certificates on consecutive occasions. This was undoubtedly a strong leverage to the company on the international level.

Over the past few years, the company's focus has been primarily directed toward providing solutions and services to the fresh produce export market on how to fight the common pests and diseases by using biodegradable and eco-friendly solutions.

These biological solutions as contrary to conventional methods have been tested and approved to be safe for use, while protecting and increasing the crop yield.

The PHI or what is commonly referred to, as the Pre-harvest interval for those products is zero, which indicates that there will not be any residual problems of synthetic substances still remaining in our crops.

These products are biological or botanical-based and hence are certified by the IMO Switzerland for use in organic farming. They also have acceptance from EUROGAP to be used according to Integrated Pest Management.

The company also provides specific vegetable varieties from our supplier TAKII-Japan; some of these varieties were successful to meet the preferences of customers in some of the European fresh crop markets.

TAKII varieties are known for their high quality assurance, productivity and variability in meeting different preferences across different markets.

Latest fertilization technologies have also found its way under Gaara's roof. This includes third generation NPK fertilizers from our French supplier Angibaud Derom & specialities. The NPK is renowned for its highest levels of total solubility, micronutrients rich, chloride-free ETC, and it's particularly suited for the characteristics of Egyptian lands.

Last but not least, Gaara Establishment will continue to endeavor to adopt and incorporate with state-of-the-art technologies, in order to provide effective and efficient solutions to the agriculture industry.

FEFA FOR FOOD INDUSTRIES

Chairman: Mohamed El-Saykhan
kilo 50 cairo-alex. desert road A.R.E
Tel.: 002 02 39103087
fax: 002 017 306 10 61
fefaolive@yahoo.com
fefafood@gmail.com
www.fefa.com.eg

Fefa for food industries have occupied a remarkable position in the Arabian and European market during the last few years. This was due to the high quality products and its capability for satisfying customer's needs.

For keeping the customer's trust in its products, Fefa for food industries crown this success by using the recent technological systems of production, starting from the farm and through the different manufacturing stages.

Fefa is considered the leading in producing & exporting olives to (USA, Spain, and Italy) and also to some Arabian countries such as Saudi Arabia, Emirates, Kuwait, Libya and Palestine.

Our aim is to produce a high quality products that meet our customer's satisfaction.

Fefa has mastered the art of keeping pickles fresh, natural and tasty. Two main factors contribute to Fefa's successful produce, carefully adding exactly the right combination of ingredients and using pasteurization rather than preservatives.

different types of peppers, corn, olives, cucumbers and vegetables.

Statistics

Fefa for food industries is distinguished by its 100% natural and high quality products manufactured from the best types of olives. With the recent European technology, the processes of selection, manufacturing, packing and packaging are performed. Thus making fefa's family products, headed by the pure extra virgin olive oil, the most essential products at every home.

Fefa for food industries owns the best planting area for olives. Our farms are located in a vast area of (700 acres) among the newly development land along the Cairo-Alex Desert Road. This sandy soil is much suitable for the plantation of the best olives with respect to its size & colour. Our farm produces the green and black olives of different varieties

- Natural Black olive
- Green olive - Pitted olive - Sliced olive
- Black olive - Pitted olive - Sliced olive
- Pickles
- Hot Paper Crushed
- Cucumbers
- Kalamata Black olives
